patelmeet2135@gmail.com — LinkedIn — GitHub

SUMMARY

Passionate Software Developer and AI/ML enthusiast skilled in MERN Stack, PHP, and Python. Experienced in building scalable applications, secure back-end systems, and intuitive UIs. Strong problem-solver with a drive for innovation and continuous learning.

EDUCATION

Pandit Deendayal Energy University (PDEU) — Gandhinagar, Gujarat
Bachelor of Technology (B.Tech) in Computer Science — *Aug 2022 – Expected 2026*

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, SQL, HTML5, CSS3
Frameworks: React.js, Node.js, Express.js, Spring Boot, Tailwind CSS, Bootstrap
Databases: MongoDB, MySQL, Firebase
Tools: Git, GitHub, Docker, Postman, AWS, Vercel, Netlify, XAMPP
Concepts: Data Structures, DBMS, OOP, OS, Computer Networks

EXPERIENCE

BrainyBeam Technologies Pvt. Ltd, Ahmedabad, Gujarat — *May 2025 – July 2025*
Web Design Intern (MERN Stack) – Worked on front-end and back-end development using the MERN stack to build responsive and dynamic web interfaces for an e-commerce and Excel analytics platform.

Excel Analytics Platform — GitHub
React, TypeScript, Node.js, Express.js, MongoDB, Chart.js

- Created an interactive data visualization dashboard for uploading and analyzing Excel files.
- Implemented secure JWT-based authentication with role-based access control.
- Enabled export of charts as PNG, PDF, and CSV formats with real-time customization.

Full-Stack Blogging Platform — GitHub
MERN Stack, JWT Auth, OAuth, Cloudinary, Tailwind CSS

- Built a blogging platform with user authentication, role-based access control, and OAuth integration.
- Implemented rich text editing, image uploads, and real-time comment features.
- Designed a responsive UI using Tailwind CSS and integrated an admin dashboard for content moderation.

PROJECTS

Beat-District – Full-Stack Music Streaming Platform — GitHub
React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary

- Developed a modern music streaming app with playlist creation, real-time streaming, and cloud media storage.
- Implemented JWT authentication, role-based access control, and secure media upload using Cloudinary.
- Built responsive UI with dark/light mode, smooth animations, and advanced search/filter functionality.
- Created RESTful API with secure routes, input validation, and optimized production build.

Car Rental Management System — GitHub
PHP, MySQL, JavaScript, HTML/CSS, Bootstrap

- Built a full-stack web app for car rental businesses with booking workflow, payment processing, and admin dashboard.
- Designed 6-table MySQL schema with secure role-based authentication and SQL injection prevention.
- Implemented real-time credit card validation, vehicle management, and responsive mobile-first design.

AI Movie Recommendation System — GitHub
Python, Scikit-learn, Streamlit, Pandas, NumPy, TMDb API

- Developed hybrid recommendation engine combining content-based and collaborative filtering.
- Integrated TMDb API for fetching real-time movie data with interactive Streamlit UI.
- Processed large datasets and implemented NMF-based collaborative filtering for personalized recommendations.

ACHIEVEMENTS

Finalist – **Odoo Hackathon**: Developed a full-stack project in under 9 hours, selected among 19,000+ participants.

Developed **ReWear** – a community clothing exchange platform GitHub

Promoting sustainable fashion through a point-based swap system, featuring user authentication, real-time swap management, and an admin dashboard.

AVAILABILITY

Open to full-time roles and internships starting in 2025, including summer and winter internships. Committed to completing the full duration of any role.
